

GREEN HOUSE GAS EMISSIONS REDUCTION PROJECT

We've been signed up to the Climate Neutral Now initiative for 2 years now. This is a way of keeping us on our toes looking for ways to minimise our impact on the environment all the way from the plant in the field to the final squeeze of the bottle. We also buy carbon credits to offset the which we currently find unavoidable. The projects which benefit from our contribution are all validated by the United Nations or the Rain Forest Alliance. Should you be interested, we have included our Green House Emission Summary from 2020 and 2021 which show that over the last year we decreased emissions well above our target of 8%.

We may not be able to keep this pace up year on year but we plan to do our best!

SCOPE	Reference	2021	2022
Scope 1	Business Travel	0.39	0.19
	Cattle & Goats	n/a	24.79
	Company site vehicles	6.10	9.60
	Fertilization	0.13	3.22
	LPG Process Gas	1.46	1.83
	Organic Materials managed soils direct	5.75	4.75
	Organic Materials managed soils indirect	1.21	1.01
Scope 2	Electricity – Self-generated	0.00	0.00
Scope 3	Business Travel	0.10	0.05
	Company Site Vehicles	1.42	2.33
	Deliveries – Nanyuki to Nairobi to Coast	12.41	8.87
	Fertiliser use	1.01	1.36
	HDPE Plastics	0.04	0.06
	LPG Processing Gas	0.18	0.22
	Packaging – aluminium	12.36	17.79
	Packaging - cartons	1.08	0.82
	Packaging – glass	0.35	0.60
	Packaging – labels	0.04	0.14
	Packaging – plastic containers	2.46	4.19
	Packaging – plastic pumps	1.17	1.87
	Packaging – plastic refill containers	5.69	7.52
	Packaging – soap boxes	0.00	0.00
	Paints varnishes and inks	0.19	0.19
	Repairs and installations	1.00	1.62
	Vegetable Oils & Butters	18.56	22.27
	Water Use	4.23	0.30
	Wood and Wood Products	1.36	0.36
	Miscellaneous items	71.02	0.00
	TOTAL CO2 in tonnes	149.71	115.95
